ABOUT ME

I'm a Sr Full Stack Developer (with Front End focus) from Argentina and currently living in Córdoba. I enjoy working on extensive teams and sharing my knowledge in order to help other people to achieve professional success. Currently focused on improving my leadership skills. I am a fan of good practices and patterns, and I am always looking for ways to improve them. Besides all the professional side, I am also a rusty amateur basketball player.

WORK EXPERIENCE

Medable – Remote | JAN 2022 – Present

Sr Developer, Front End (React, Nx, mobx, I18N & Gitlab CI)

- Took ownership on creating a new solution to support internationalization for more than 120 locales.
- Participate on different discussions and definitions to allow the i18n solution to scale up without big efforts.
- Took ownership on the creation of a solution to simplify the translation processes, simplifying the detection of missing translations and the import of new translations.
- Added several new practices on different repositories used for the internationalization of the different company products

Halo Media LLC – Remote | SEP 2021 – DEC 2021

Sr Software Engineer (React, NextJS & Team Leadership)

- Took the lead on a highly customizable and generic project in order to take it to the next level
- Added CI/CD for different projects and standardize the CI/CD structure among all these projects
- Performed technical interviews for React positions
- Defined and coordinated an approach to create an internal and re-usable library

Rafr – Remote | APR 2020 – SEP 2021

Frontend Developer & Team Lead (React, NextJS & Team Leadership)

- Led a 4 people team working on a three-projects solution
- Participated on different product definition reviews in order to polish out possible troubles ahead of time.
- Took ownership on solving urgent production issues.
- Led all Agile meetings (dailies, groomings, plannings, retrospective, demo).
- Added CI/CD for all projects.
- Improved web application performance (reducing TTFB, improving SSR, etc).
- Created a new isolated project working as a micro-frontend and a common library to share among those projects (and future ones).
- Pushed different web standards to be the default on the different web projects (Typescript, Pull Request, correct tracking of work, etc).

24 Hour Fitness – Remote | OCT 2019 – APR 2020

Software Engineer (Angular & NGXS)

- Designed and developed a new platform for purchasing Gym memberships, allowing users to add different ancillary products to complement the membership.
- Increased the unit test coverage from 50% to 70%.
- Pushed different Angular development patterns.
- Added CI/CD for the project
- Coordinated a three contractors' team to build product owner specifications.

Thirdlove – Córdoba, Argentina | JUN 2019 – SEP 2019

Full Stack Engineer (React, NodeJs & GraphQL)

- Re-designed and developed one the company's insignia app called FitFinder that run as micro frontend project connected to different BE micro services
- Part of the team setting the bases for a shared components library to be used on all projects inside the company
- Worked on different CI/CD Integrations
- Created an application for easy deployments on AWS via cmd

McAfee – Córdoba, Argentina | FEB 2017 – MAY 2019

Software Development Engineer (Angular & Java)

- Led 3 teams of 5-6 people each (shared leadership)
- Designed and developed a common library to be used across different projects on the company (with projects on a "consumer/collaborator" basis and others on a "only consumer" basis)
- Worked side-by-side with PO and UX to make features to reach excellence
- Led features end-to-end (Architectural designs, DB communication, wireframes feedbacks, mocks feedbacks, and productive code deployment)
- Designed and developed an integrated application that will run partially on Angular and partially on AngularJs (to support retro-compatibility)

Globant – Córdoba, Argentina | FEB 2016 – JAN 2017

Web UI Developer (AngularJS & Pixijs)

- Worked on a busy team, sometimes under pressure, making friendly & interactive projects of eLearning on short periods of time.
- Built a Windows simulator to train people for a call center

TravelPAQ – San Juan, Argentina | APR 2015 – JAN 2016

Full Stack Developer (AngularJS & PHP)

- Worked on great startup from the scratch
- Built different components for the frontend as well as different services for the backend
